Judy Security

Work Safer.
Work Smarter.
Spend Less.

We believe that the size of your business (or budget) shouldn't limit your ability to combat cyber threats. That's why we created Judy, the all-inclusive cybersecurity platform that's easy to install, easy to manage, and provides the protection and support you need—at a price you can afford.

Easy-to-Use, All-in-One Platform

Onboarding new software can be daunting, which is why Judy's all-inclusive platform includes everything you need to get your team up to speed. You'll save time and resources while keeping your information secure and your team happy, safe, and productive.

Security You Can Trust

Designed to be both effective and affordable, Judy was built to the highest industry standards using the latest technology. With Judy, you can be confident that your most sensitive customer and company data is always under lock and key.
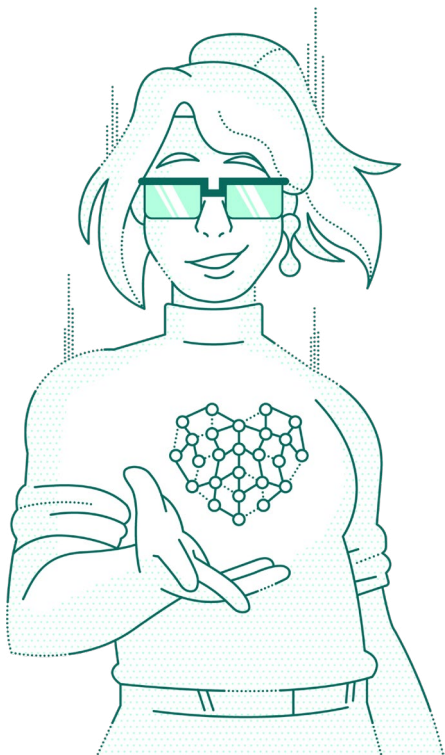

24/7 Protection and Support

Backed by next-gen automated threat monitoring and remediation (and by Judy's live customer success team), Judy delivers the protection and cybersecurity services you need—without the cost of additional staff or contractors.

Meet Judy.

She's your virtual cybersecurity solution, and the heart (and brains) of our platform. Judy works 24/7 across all your devices to secure your most sensitive company and customer information. Built using the latest AI and machine-learning technology, Judy leverages a robust set of features to protect your brand, your customers, and your bottom line.

All-Inclusive, Custom-Fit Protection

Judy is scalable and built specifically to fit the needs of SMBs. We offer three levels of protection to meet you where you are right now, and continue on as your trusted cybersecurity solution as your business grows.
	Identity	Defense	Advanced	Premium
Multi-Factor Authentication	✓		✓	✓
Single-Sign On (SSO)	✓		✓	✓
Passwordless	✓		✓	✓
Endpoint Detection & Response (EDR)		✓	✓	✓
DNS Filtering		✓	✓	✓
Judy's Blue Team: SIEM + MDR/XDR		✓	✓	✓
Security Awareness Training				✓
Automated Compliance Management & Reporting				✓
e-Purifier			✓	✓

Judy Identity Access & Threat Defense

Built to provide a solid cybersecurity foundation for even the smallest businesses, Judy focuses on Identity Access and Threat Defense as essential pillars of its cybersecurity offerings. Designed to be both efficient and effective, Judy is user-friendly and simple to manage, making it accessible for small businesses to implement critical security measures without overwhelming complexity. Additionally, Judy offers dedicated live customer support, ready to help with any questions or issues that may arise.

- **Judy's Identity Access** leverages single sign-on and multi-factor authentication with a secure mobile app for passwordless access, boosting security and compliance while reducing human error.
- **Judy's Threat Defense,** enhanced with DNS Filtering, Endpoint Detection and Response (EDR), and integrated SIEM + MDR/XDR, delivers advanced anti-phishing, automated 24/7 security across your digital environment, with unlimited device protection. This robust approach ensures your network is safeguarded against complex threats.

Judy Advanced & Premium

As you grow, so do your compliance and security needs. Judy was built to scale with you so you can avoid the hassle of sourcing and onboarding new solutions. With our Advanced and Premium options you'll have access to the same powerful security and compliance tools, training, and talent as the enterprise, for a fraction of the cost.

Judy's Blue Team:
Cloud SIEM + MDR/XDR
Automates threat monitoring and remediation with a powerful Security Information and Event Management (SIEM) solution, along with a live team of security experts to protect your environment.

- 1-year log retention for unlimited data
- 24/7 security operations support for critical issues
- Detection rule management, allowlisting and customization
- Automated blocking of threats with dynamic blocklists

- Honeypots
- Support for firewall and Windows/Linux logs
- Custom and scheduled reporting 60+ integrations at no additional cost
- Instantly deployable

Security Awareness Training*
Short, animated, monthly episodes based on real incidents to provide a fun, engaging way to help your organization meet compliance and prevent security incidents caused by human error. The program is easy to deploy and manage to help your team stay aware of the latest security threats.

Automated Compliance Management & Reporting*
Provides one-click access to best-in-class tools to easily map to frameworks including: SOC2, NIST, CMMC, PCI and more. With Judy on your side, you'll be able to win and retain business, and ensure audit and reporting requirements are met—for a fraction of the cost and effort.

*Features available with Premium Only (also includes Endpoint Risk Assessment Scan to identify vulnerabilities across all your organization's users and devices).

Judy Security

The Old Way Doesn't Work.
Judy Is The New Way.

- Built for MSPs: Pre-engineered security without the complexity
- Affordable Fixed Pricing: Flexible options that suit your budget
- Always-On Protection: Set it. Forget it.
- AI Empowers Community Immunity: Strengthening SMBs and the entire digital economy
