Judy Security

Cloud-Based Email Protection Solution Powered by AI

Safeguard your business communications with Judy's Email Protection. Our cutting-edge cloud-based email security solution integrates AI technology to offer unparalleled protection. Judy's Email Protection can seamlessly integrate with any email vendor, providing unmatched defense against evolving threats for small and medium-sized businesses.

Key Features:

Sophisticated Threat Protection

Provide core email protection from phishing, malware, and spam with an intelligent filtering engine that goes beyond reputation scanning to analyze malicious behaviors and prevent threats from breaking through traditional barriers.

24/7 Protection and Support

Receive round-the-clock technical support to ensure your email security solution is always up and running smoothly, with experts available to assist you whenever you need assistance.

Scalability

Scale your email security solution to any size with Judy's flexible and scalable platform, ensuring it adapts to your business's needs as it grows.

Unlimited Archive

Safeguard your vital email communications with fully automated and secured cloud-based archiving for all incoming and outgoing messages, ensuring compliance with audit-proof archiving requirements.
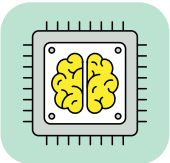

Benefits:

World-Leading Anti-Spam and Antivirus Engines

Benefit from industry-leading anti-spam and antivirus engines that provide 100% protection against malware and spam, including zero-hour protection.
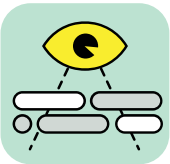

Phishing Detection

Detect and prevent phishing attacks with 100% accuracy and zero false positives, ensuring your business remains protected from email-based threats.

Cutting-Edge AI and Machine Learning

Leverage cutting-edge AI and machine learning technologies to defend against highly sophisticated threats with unmatched accuracy.

Zero-Trust Approach

Adopt a zero-trust approach, thoroughly scanning all emails for potential risks and ensuring comprehensive protection against emerging threats.

Additional Features:

✔ **TLS Encryption:** Secure email with TLS encryption, preventing third parties from spying on email in transmission.

✔ **Email Continuity:** Safeguard your vital email communications in the event of power outages, hard disk crashes, and more. With 99.9% availability, our email continuity servers keep your messages accessible, secure, and continual no matter what events may occur.

✔ **Email Archiving:** Fully automated and secured cloud-based archiving for all incoming and outgoing messages eliminates the need for administrative tasks dedicated to archiving. Our services comply with audit-proof archiving requirements, meaning that messages cannot be altered once archived. They are stored in encrypted databases in secure, certified data centers.
